WEB 1

Whoever made these notes may they become a billionaire 💸

Practical HTML program codes

1. Write a HTML program to create a web page describing your College and Departments.

(a) Use Header, paragraph and list tags.
(b) Apply font styling (Italics, Bold, Underline), font colors for the keywords
(c) Create links on the Departments and takes user to other page
(d) Insert an image and create a link such that clicking an image takes user to other page
(e) change the bg color of the webpage

college.html

```
<html>
<head>
<title>My College</title>
</head>
<body bgcolor="lightyellow">

<center>
<h1><font color="blue">MEASI Institute of Information Technology</font></h1>
</center>

<p>My college is a <b>well-known</b> institution
providing <i>quality education</i> to students.
It offers <u>various departments</u>.</p>

<h2>Departments</h2>
<ul>
<li><a href="cs.html">Computer Science</a></li>
<li><a href="it.html">Information Technology</a></li>
<li><a href="bca.html">BCA</a></li>
</ul>
```

```
<img src="image.jpg" width="200" height="150">

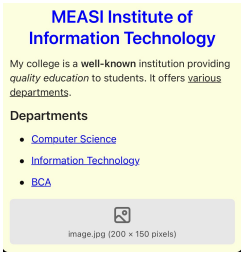

</body>
</html>
```

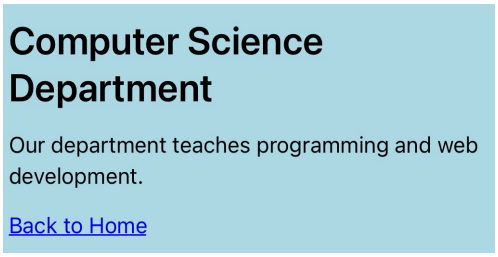

cs.html

```
<html>
<body bgcolor="lightblue">
<h1>Computer Science Department</h1>
<p>Our department teaches programming and web development.</p>
<a href="college.html">Back to Home</a>
</body>
</html>
```

Add an image.jpg

Output

2. Create the following table in HTML with Website logo, Website name and links to Home, Login, Registration, Catalogue and Cart for an online book store web site.

Logo | Web Site Name. | Home | Login | Registration | Catalogue | Cart.

bookstore.html

```
<html>
<body>
<table border="1" width="100%" cellpadding="10">
<tr>
<th>Logo</th><th>Website Name</th>
<th>Home</th><th>Login</th>
<th>Registration</th><th>Catalogue</th><th>Cart</th>
</tr>
<tr>
<td><img src="logo.png" width="50"></td>
<td>Book Store</td>
<td><a href="home.html">Home</a></td>
<td><a href="login.html">Login</a></td>
<td><a href="register.html">Registration</a></td>
<td><a href="catalogue.html">Catalogue</a></td>
<td><a href="cart.html">Cart</a></td>
</tr>
</table>
</body>
</html>
```

home.html

```
<html>
<body>
<h1>HOME</h1>
</body>
</html>
```

Add logo.png

1. Output of `bookstore.html`

Logo	Website Name	Home	Login	Registration	Catalogue
	Book Store	Home	Login	Registration	Catalogue

2. Output of

`home.html`

When you click the Home link:

HOME

3. Develop a static Home Page using frames for an online shopping website.

index.html

```
<html>
<head><title>Online Shopping</title></head>

<frameset rows="20%,80%">
   <frame src="top.html">
   <frameset cols="25%,75%">
      <frame src="left.html">
      <frame src="home.html" name="main">
   </frameset>
</frameset>

</html>
```

top.html

```
< html>
<body bgcolor="lightblue">
<center><h1>ONLINE SHOPPING</h1></center>
</body>
</html>
```

left.html

```
<html>
<body bgcolor="lightyellow">
<h3>Menu</h3>
<a href="home.html" target="main">Home</a><br>
<a href="login.html" target="main">Login</a><br>
```

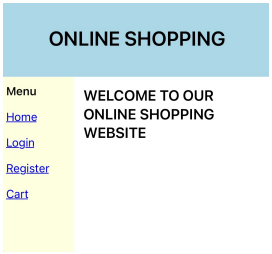

```
<a href="register.html" target="main">Register</a><br>
<a href="cart.html" target="main">Cart</a>
</body>
</html>
```

[home.html, login.html, register.html, catalogue.html, cart.html]

home.html

```
<html><body><h1>WELCOME TO OUR ONLINE SHOPPING WEBSITE</h1></body></html>
```

Output

4. Develop a static Login Page using HTML and CSS.

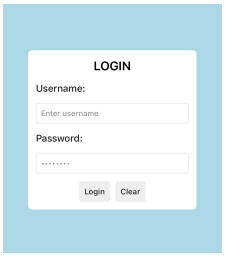

login.html

```
<html>
<head>
<title>Login</title>
<style>
body {background: lightblue; text-align: center;}
form {background: white; padding: 20px; margin: 100px auto; width: 250px;}
</style>
</head>
<body>

<form onsubmit="alert('Login Successful!'); return false;">
<h2>LOGIN</h2>
Username:<br><input type="text"><br>
Password:<br><input type="password"><br><br>
<input type="submit" value="Login">
<input type="reset" value="Clear">
</form>
```

```
</body>
</html>
```

Output

5.Create a simple horizontal navigation bar using HTML and CSS that includes main menus and sub menus.

index.html

```
<html>
<head>
<title>Navigation Bar</title>
<style>
ul {list-style:none; background:rgb(226, 43, 43); padding:10px;}
li {display:inline-block; padding:10px;}
a {color:white; text-decoration:none;}
.sub {display:none; position:absolute; background:black;}
li:hover .sub {display:block;}
</style>
</head>
<body>

<h2>MEASI INSTITUTE OF INFORMATION TECHNOLOGY</h2>
<ul>
<li><a href="#">Home</a></li>
<li><a href="#">About</a>
<ul class="sub">
<li><a href="#">College</a></li>
<li><a href="#">Staff</a></li>
```

```
</ul></li>

<li><a href="#">Courses</a>
<ul class="sub">
<li><a href="#">BCA</a></li>
<li><a href="#">B.Sc</a></li>
</ul></li>

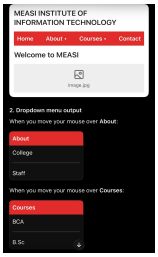

<li><a href="#">Contact</a></li>
</ul>

<h2>Welcome to MEASI</h2>
<img src="image.jpg">

</body>
</html>
```

Add an image.jpg

Output

8. Design a User login page using HTML and CSS. Write a Javascript program to validate user login page.

login.html

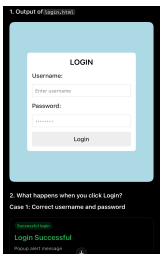

```
<html>
<head>
<title>Login</title>
<style>
body {background:lightblue; text-align:center;}
form {background:white; padding:20px; margin:100px auto; width:250px;}
</style>
</head>
```

```
<body>

<form onsubmit="return validate()">
<h2>LOGIN</h2>
Username:<br><input type="text" id="u"><br><br>
Password:<br><input type="password" id="p"><br><br>
<input type="submit" value="Login">
</form>

<script>
function validate() {
if(document.getElementById("u").value=="admin" &&
document.getElementById("p").value=="1234")
{
alert("Login Successful");
}
else
{
alert("Invalid Username or Password");
}
return false;
}
</script>

</body>
</html>
```

Case 2: Wrong username or password

Invalid Username or Password

Popup alert message
